Name of Insurance Company _____ Identification Number _____

Primary Insured's / Sponsor's Name _____ Primary Insured's Date of Birth _____

Patient relationship to primary insured ☐ Self ☐ Spouse ☐ Child

Vision Insurance Information

Name of Insurance Company _____ Identification Number _____

Primary Insured's Name _____ Primary Insured's Date of Birth _____

Patient relationship to primary insured ☐ Self ☐ Spouse ☐ Child

Please Read:

Please be advised that the patient is responsible for providing a current copy of his/her insurance cards and Photo ID. Your Photo ID is important to protect against medical identity theft. The patient is also responsible for obtaining and providing a referral when required by the insurance company. Without the required information it will be the responsibility of the patient to pay for the services rendered on the day of the visit. Please be aware that Medicare and many other health insurance companies will not cover charges for items which may include, but are not limited to, refractions or medical supplies, which may be part of your eye examination. Healthcare regulations require us to collect all co-payments, deductibles, and non-covered service fees or face charges of fraud. Non-covered service fees and co-payments are DUE ON THE DAY THE SERVICES ARE RENDERED.

Family History

Diabetes ☐
High Blood Pressure ☐
Heart Disease ☐
Cancer ☐
Cataracts ☐
Glaucoma ☐
Macular Degeneration ☐

PLEASE READ: DILATION CONSENT

DILATION of your eyes is part of a comprehensive eye examination.

To dilate the eyes, drops are used to relax the muscle which controls the pupil size, allowing the pupil to fully open. A wait time of 20 minutes is required to allow the drops to take effect before the doctor can complete the dilation.

Side effects of dilation can include short-term blurred vision up close, and in some cases far away, as well as sensitivity to light. (Temporary sunglasses will be given to the patient to help with this side-effect.)

Patients with high prescriptions, new floaters and flashes, diabetes, and high blood pressure are STRONGLY advised to have their eyes dilated yearly. In addition, patients with a family history of glaucoma, macular degeneration or blindness should follow the same guidelines.

REFUSAL TO HAVE YOUR PUPILS DILATED MAY CAUSE YOUR DOCTOR TO BE UNABLE TO DETECT CERTAIN DISEASES.

Please check one of the following:

- ☐ I AGREE to have my eyes dilated (or give permission to have my child's eyes dilated, if the patient is a minor).
- ☐ I understand the importance of dilation but REFUSE to dilate my eyes today.
- ☐ I would like to DISCUSS dilation with the doctor.

By signing below, you are attesting that all information you have presented here is correct, accurate, and up to date.
